PROFESSIONAL SUMMARY

Operations & Project Analyst with hands-on experience in KPI dashboard development, performance reporting, and data analysis across operational and project environments. Proficient in Advanced Excel (Pivot Tables, Power Query, XLOOKUP, advanced formulas) for day-to-day reporting, data validation, and business intelligence. Additionally skilled in Power BI (DAX), SQL, and Python through self-driven analytics projects, enabling stronger data-driven decision support.

WORK EXPERIENCE

Operations Analyst | Aleph India Group

July 2025 – Present

- Perform data validation and quality monitoring across 50+ operational projects to ensure data accuracy and process consistency.
- Build KPI dashboards and business intelligence reports using Excel (Pivot Tables, Power Query, advanced formulas) to track operational efficiency and surface data-driven insights.
- Support ad-hoc analysis requests from cross-functional teams, translating raw data into clear, actionable reports for stakeholders.

Operation Support Analyst | Emphatic Vans and Testing Labs Pvt Ltd

March 2024 – June 2025

- Managed documentation and project records for 90+ international projects, coordinating with cross-functional teams to ensure timely delivery of reports.
- Conducted data validation and process monitoring checks to maintain data accuracy and consistent reporting standards.
- Generated KPI tracking dashboards and performance reports using Excel and Power BI, enabling data-driven decision-making for project management.

KEY PROJECTS

Supply Chain Delivery Performance Dashboard | Tools: Python, Pandas, NumPy, Power BI, DAX, Scikit-learn, Matplotlib

- Cleaned and pre-processed supply chain datasets using Python; built an ML model (Scikit-learn) to predict delivery delays with KPIs developed in DAX.
- Designed interactive multi-page Power BI dashboards with heatmaps and charts, delivering business intelligence insights for operational decision-making.
- Developed an ML-based delay prediction model using Scikit-learn and integrated DAX KPIs into an interactive multi-page Power BI dashboard for business decision-making.

Indian Railway Delay Analysis | Tools: Python, Pandas, Power BI, DAX, Feature Engineering

- Built end-to-end analytics to analyse train delays and congestion patterns; performed EDA and feature engineering to uncover operational bottlenecks.
- Designed a 5-page interactive Power BI dashboard with data storytelling, slicers, and KPIs for railway performance optimization.
- Utilised DAX measures, slicers, and data storytelling techniques to deliver actionable insights for railway performance optimisation.

Fake Job Posting Fraud Detection Dashboard | Tools: Power BI, Power Query, DAX, Advanced Excel

- Developed a business intelligence dashboard detecting fraudulent hiring patterns; used DAX KPIs and Power Query for ad-hoc analysis across industries and regions.
- Developed interactive Power BI dashboards featuring fraud KPIs, industry-wise analysis, remote job trends, salary distribution, and employment type insights.
- Applied feature-level analysis and data validation techniques to detect inconsistencies and uncover potential fraudulent recruitment activities.

TECHNICAL SKILLS

Data Analysis & BI: Python & libraries, SQL (MySQL, PL/SQL), Power BI (DAX, Data Modeling, Business Intelligence)

Excel: Advanced Excel – Pivot Tables, XLOOKUP, Power Query, Conditional Formatting, Data Validation

Data Skills: Data Cleaning, Feature Engineering, Data Storytelling, Dashboard Design

Reporting & Analytics: KPI Development, Performance Reporting, Operational Insights, Data-Driven Decision Making

Tools & Systems: MS Office 365, Google Sheets, CRM Systems, Power Automate

EDUCATION

B. Tech – Computer Science & Engineering

2020 – 2024

Raj Kumar Goel Institute of Technology, Ghaziabad | SGPA: 8.35

Senior Secondary (PCM) – Sterling School, Varanasi

2018 – 2020 | 79.80%
